

SECRET

I. Statement of Issue/Challenge - Surge Collection and Analysis

Our Definition: A rapid increase in intelligence coverage - collection, processing and analysis - including an increase in the output of finished intelligence, of a specific country or region for which we were not able to specifically budget. The period of interest may last from weeks to many months.

Assumptions:

- 1) The production and deployment of additional overhead collectors will be treated by the NRO and not us.
- 2) Tasking of existing NRO, NASA, and NSA collection assets will be in accordance with established practices.
- 3) Tasking of NPIC and NSA for processing of collected surge intelligence will also be in accordance with established practices.
- 4) Existing cooperative agreements between CIA and others (State, DOD elements, etc.) will be honored.
- 5) The applicability of technical collection systems against a particular surge collection problem are very highly dependent on the circumstances and cannot be treated specifically in this paper.

NOTE: In sections III and IV take the opportunity to point out desired corrections to any shortcomings known or predicted in the established practices and agreements mentioned in assumptions 2, 3, and 4 above.

SURGE COLLECTION AND ANALYSIS

II, III, IV Suggested Outline

Responsible

- | | |
|---------------------------------|------|
| A. Broadcast Monitoring | FBIS |
| B. SIGINT (W/O Overhead) | OSO |
| C. HUMINT | DO |
| 1. DO including SOG | |
| 2. OTS Support | |
| D. Crisis Management | ORD |
| E. Analysis/Reporting | NFAC |
| F. Support | |
| 1. Communications | O/C |
| 2. Logistics | O/L |
| 3. Finance (including Monetary) | O/F |

° Limit each paragraph (e.g., IIA or IIIF) to a single double-spaced side (typed please).

° Assumptions will be stated in Section I. S&T Staff will write Section I so send your necessary assumptions to S&T Staff ASAP. Hand carry or fax.

° Team Leader: C/PD/PRS/DDS&T

THINKING POINTS
SURGE COLLECTION AND ANALYSIS

I. Statement of Issue/Challenge

Definition
How Team Sees It
Assumptions/Caveats
NRO Deployments
Tasking of NRO/NASA/DOD Assets
Tasking of Sigint Assets
Tasking of NPIC/NSA for Processing
Necessary Cooperation of State/DOD Support
Technical Collection Dependent on Circumstance

II. Existing Capabilities/Plans

What is in FY-82 thru 86 Prog?

What can we/do we do now?

(present approach)

Redeployment of existing assets

OTS QRC

OSO QRC

FBIS QRC?

OSO/

25X1

25X1
25X1
25X1

Present mechanism of constituting crisis/task teams?

25X1

III. The Gap - What more should we do?

More of something

New approaches

R&D Required

From concrete examples of recent crises - what was lacking?

QRC Commo Support

IV. Increments to Capabilities

What to do about gaps

Broad view

Resource Requirements, timing

MOU's with Other Agencies

A surge contingency plan
